Hi Adyen team!

I came across your posting for a POS Services PM and thought that I might be a good fit for your team. I've worked extensively in the POS industry, specifically in the QSR/SaaS sector serving 4000+ locations, 100,000+ devices and tens of thousands of employees/users.

I'm experienced in most areas of a Point of Sale organization: front-line support, vendor relations, Hardware partnerships and certification, software development, compliance training, technical documentation and beyond. Thanks for your consideration, and I look forward to seeing if we can work together.

-Max
