Gameplay Systems Engineer

Hi Catawiki Team!

    I saw your posting for a Back-End Developer and was very interested in some of the things you mentioned. As a Systems Engineer with 10+ years in the tech industry, I'm more and more excited about infrastructure as code every day, especially tools like Linux, GCP/AWS, Terraform, Docker, Kubernetes and Ansible! I'm also working on my golang skills outside of my current position and I was excited to see your team is using it. I'd love to have more time and opportunity to work with it! If you think my skills and experience listed in my attached resume would be a benefit to your team, I'd love to talk more about the role.

Cheers!
-Max
